

Transfer Guide

Waubonsee Community College to Wheaton College

This document is a guide for high school dual enrollment students, students who begin their degree at Waubonsee Community College, and current students looking to supplement their education. This guide is not exhaustive and is subject to change without notice.

Core Competencies:

Writing - ENG 101 and 102 are both required to fully meet Wheaton's writing competency.

Oral Skills - COM 100. Any oral communication courses must be taken in person, not online.

Modern or Classical Language - Wheaton College requires completion through the Intermediate Level (Intermediate II) to meet competency. All language courses must be taken in person. Online courses are not accepted for transfer credit.

Thematic Core

A maximum of four themes can be met with transfer credit. (Transfer students with 60+ credits may bring in six themes at the time of transferring, but are locked into limits once they become Wheaton students.) Once students already have four themes met, additional coursework is applied to major, minor, or certificate requirements, or is transferred into Wheaton as elective credit.

Philosophical Investigations - PHL 100, PHL 105, or PHL 120

Historical Perspectives – HIS 101 or 102

Literary Explorations - ENG 212, 215, 221, 222, 226, 229, or 230

Diversity in the United States – DIS 101, IDS 110, or SOC 120

Social Inquiry - ANT 101, ECN 201, PSC 100 or 220, PSY 100, or SOC 100

Scientific Practice (Lab Sciences)*- BIO 100+101 or BIO 120, ESC 100+101, or PHY 111 or PHY 221.

Scientific Issues & Perspectives - AST 100, AST 105, or ESC 110

Global Perspectives - RLG 240 or HUM 102

AAQR (Math) - MTH 131 if calculus is needed for your intended major. Otherwise MTH 107, 130, 131, 210, or 211 will meet the AAQR requirement.

Visual & Performing Arts - ART 100, THE 100, and MUS 100 (Need two choices to complete the theme. Can be taken individually.)

Major Courses

Round out your schedule with **entry level** courses in a major you are interested in pursuing. Wheaton College requires a certain number of courses in the major be taken at Wheaton, so it is best not to take a large number of major courses.

*If majoring in Biology, Chemistry, or Applied Health Science, take BIO 120 & 122 and CHM 121. We do not recommend taking Anatomy & Physiology courses. Engineering & Physics majors should begin with PHY 221. All SP theme courses must include an in person weekly lab.

- Wheaton College does not transfer associate degrees; instead, transfer credits are awarded based on a course-by-course review. Final determination of transfer credit articulation is at the discretion of Wheaton College.
- The Academic Advising Office does not complete transfer evaluations until students have applied and are admitted to the College.
- Current matriculated students must obtain pre-approval of all courses taken outside of Wheaton College, whether they are on this list or not.
- Incoming first-year students are limited to 40 dual enrollment credits.

Please consult the Wheaton College Catalog at www.wheaton.edu/catalog regarding current policies and requirements.
