SHS will review this form and contact you if you need an individual plan for further testing. Testing mayinclude a PPD skin test(s) or an IGRA blood test. These services may be available through Student Health Services.

For non-SHS Medical Providers, please use TB SCREENING SUPPLEMENT FOR MEDICAL PROVIDERS (page 6) to provide additional documentation.

TB SCREENING SUPPLEMENT FOR MEDICAL PROVIDERS

This page should be provided to your medical provider if a new PPD skin test has been administered or an IGRA blood test has been completed based on the information on the TB Screening Questionnaire (page 4). **Student please provide this supplement to your medical provider to complete if they administered/performed one of these tests. If you have prior testing or TB Treatment, please provide the official report(s).**

Additional Notes:

1. If BCG was received, an IGRA is preferred to a PPD.
2. If immune deficient, testing may be falsely negative and there is greater risk of progression from LTBI to active disease
3. If a live vaccine was recently received or patient is ill, consider delaying IGRA testing until 4-6 weeks after vaccination or illness to avoid a false positive result.
4. If PPD positive complete IGRA. If IGRA is positive, send chest x-ray results
